BIG IDeA ACCESSIBILITY & MAPATHONS

Screenshot from Wheelmap Beta

ACCESSIBILITY

ACCESSIBILITY

IS MUCH MORE THAN JUST THE BUILT ENVIRONMENT

MAPATHONS

LOOK BEYOND THE ENTRYWAY, AND EXAMINE BUSINESSES' ACCESSIBILITY ON MANY FRONTS

WHAT IS A MAPATHON?

Mapathons are a method of evaluating the accessibility of a business or facility with regards to their built environment as well as customer service concepts and interior layout access.

WHAT WE LOOK AT:

Access to Entryway
Ability to Navigate Interior
Adequate Lighting Indoors
Guide Dog Access
Adequate Noise Levels
Accessible Parking
Staff Actions (Offers of aid in lieu of built environment issues)

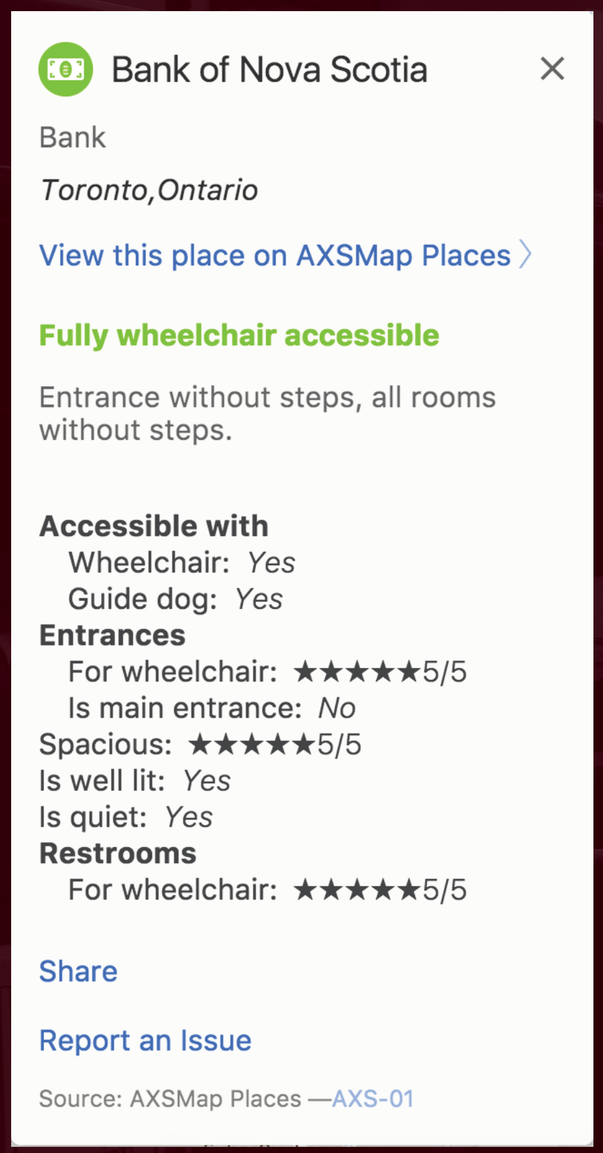
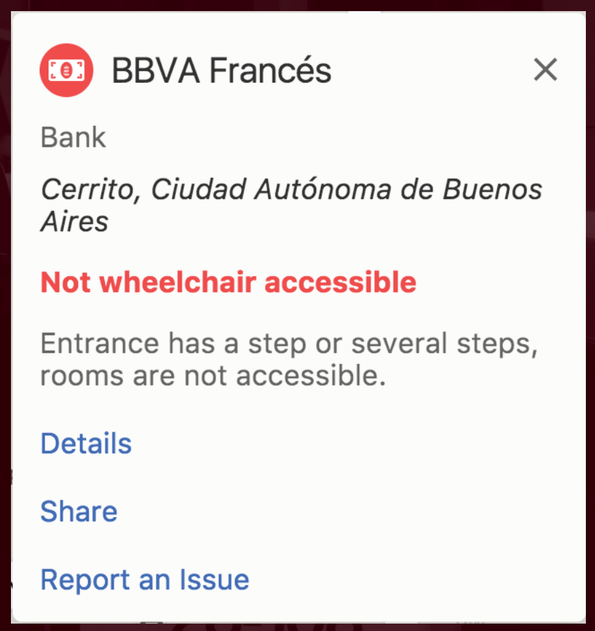
ACCESSIBILITY CLOUD

Wheelmap is one of several contributing organizations in the Accessibility Cloud, which is a cloud sharing application for people around the world to share global accessibility information with other users across all of their platforms. An American using AXSmap can fill out an accessibility Mapathon review of a business, and have a German user on Wheelmap access the same review in terms that they are used to.

ACCESSIBILITY CLOUD





Using accessibility cloud, Wheelmap will soon have global review access on their site from all of their partners, including all of their additional information.

CONCLUSION

Mapathons give us the chance to take willing participants, and show them just how many different aspects of access we interact with every day, and a chance to interact with them first hand.

THANK YOU
